Item 2.02 Results of Operations and Financial Condition

On October 18, 2023, Abbott Laboratories announced its results of operations for the second quarter 2023.

Furnished as Exhibit 99.1, and incorporated herein by reference, is the news release issued by Abbott announcing those results. In that news release, Abbott uses various non-GAAP financial measures including, among others, net earnings excluding specified items. These non-GAAP financial measures adjust for factors that are unusual or unpredictable, such as expenses primarily associated with acquisitions, restructuring actions, cost reduction initiatives, a voluntary recall, charges for intangible asset impairments, fair value adjustments to the contingent consideration related to business acquisitions, certain regulatory costs, tax benefits associated with specified items, net tax expense as a result of the resolution of various tax positions related to prior years, and excess tax benefits associated with share-based compensation. These non-GAAP financial measures also exclude intangible amortization expense to provide greater visibility on the results of operations excluding these costs, similar to how Abbott's management internally assesses performance. Abbott's management believes the presentation of these non-GAAP financial measures provides useful information to investors regarding Abbott's results of operations as these non-GAAP financial measures allow investors to better evaluate ongoing business performance. Abbott's management also uses these non-GAAP financial measures internally to monitor performance of the businesses. Abbott, however, cautions investors to consider these non-GAAP financial measures in addition to, and not as a substitute for, financial measures prepared in accordance with GAAP.

Abbott Reports Third-Quarter 2023 Results and Raises Midpoint of Full-Year EPS Guidance Range

- Sales of \$10.1 billion driven by strong underlying base business performance
- Reported sales decreased 2.6 percent due to anticipated decline in COVID-19 testing-related sales versus prior year
- Organic sales growth for underlying base business of 13.8 percent, reflects double-digit growth in each of the four major businesses

ABBOTT PARK, Ill., Oct. 18, 2023 — Abbott today announced financial results for the third quarter ended Sept. 30, 2023.

- Third-quarter GAAP diluted EPS of \$0.82 and adjusted diluted EPS of \$1.14, which excludes specified items.
- Abbott narrowed its full-year 2023 EPS guidance range. Abbott projects full-year diluted EPS on a GAAP basis of \$3.14 to \$3.18 and projects adjusted diluted EPS of \$4.42 to \$4.46, which represents an increase at the midpoint of the guidance range.
- Abbott continues to project full-year 2023 organic sales growth, excluding COVID-19 testing-related sales¹, to be in the low double-digits².
- In July, Abbott obtained CE Mark for its AVEIR[™] single-chamber leadless pacemaker for treating patients with slow heart rhythms. Unlike traditional pacemakers, leadless pacemakers do not require an incision in the chest to implant or leads (wires) to deliver therapy.
- In September, Abbott acquired Bigfoot Biomedical, a leader in developing insulin management systems, furthering Abbott's efforts to develop connected solutions for making diabetes management even more personal and precise.
- In September, Abbott expanded its existing collaboration with global biotech leader mAbxience Holdings S.L. to commercialize several biosimilar molecules, with the goal of broadening access to these therapies for people in emerging markets.
- In September, Abbott published an analysis showing a complementary relationship between the company's FreeStyle Libre[®] continuous glucose monitoring system and GLP-1 medications. The analysis also showed that a growing number of people are using these tools together to support behavior change to optimize the treatment of diabetes and improve overall health.

"The investments we made during the pandemic continue to drive broad-based growth across our underlying base business," said Robert B. Ford, chairman and chief executive officer, Abbott. "We're on track to deliver on the financial commitments we set at the beginning of the year, and the momentum we're building across the portfolio positions us well as we head into 2024."

THIRD-QUARTER BUSINESS OVERVIEW

Management believes that measuring sales growth rates on an organic basis, which excludes the impact of foreign exchange, the impact of exiting the pediatric nutrition business in China, and the impact of the acquisition of Cardiovascular Systems, Inc. (CSI), is an appropriate way for investors to best understand the core underlying performance of the business. Management further believes that measuring sales growth rates on an organic basis excluding COVID-19 tests is an appropriate way for investors to best understand underlying base business performance as the COVID-19 pandemic has shifted to an endemic state, resulting in significantly lower demand for COVID-19 tests.

Note: In order to compute results excluding the impact of exchange rates, current year U.S. dollar sales are multiplied or divided, as appropriate, by the current year average foreign exchange rates and then those amounts are multiplied or divided, as appropriate, by the prior year average foreign exchange rates.

Worldwide Nutrition sales increased 15.5 percent on a reported basis and 18.1 percent on an organic basis in the third quarter. Refer to page 16 for a reconciliation of adjusted historical revenue to reported revenue.

In Pediatric Nutrition, global sales increased 20.9 percent on a reported basis and 24.9 percent on an organic basis. In the U.S., sales growth of 41.8 percent was primarily driven by continued market share recovery in the infant formula business following a voluntary recall of certain products last year.

In Adult Nutrition, global sales increased 10.8 percent on a reported basis and 12.4 percent on an organic basis, which was led by strong global growth of Ensure®, Abbott's market-leading complete and balanced nutrition brand.

Worldwide Medical Devices sales increased 16.6 percent on a reported basis and 14.7 percent on an organic basis in the third quarter. Sales growth was led by double-digit organic growth in Diabetes Care, Electrophysiology, Structural Heart, and Neuromodulation. Several recently launched products and new indications contributed to the strong performance, including Amplatzer® Amulet®, Navitor®, TriClip®, and AVEIR.

In Electrophysiology, internationally, sales grew more than 20 percent on a reported and organic basis, which includes mid-teens growth in Europe.

In Diabetes Care, FreeStyle Libre sales were \$1.4 billion, which represents sales growth of 30.5 percent on a reported basis and 28.5 percent on an organic basis.

ABBOTT'S EARNINGS-PER-SHARE GUIDANCE

Abbott projects full-year 2023 diluted earnings per share under GAAP of \$3.14 to \$3.18. Abbott forecasts specified items for the full-year 2023 of \$1.28 per share primarily related to intangible amortization, costs associated with acquisitions, restructuring and cost reduction initiatives and other net expenses. Excluding specified items, projected adjusted diluted earnings per share would be \$4.42 to \$4.46 for the full-year 2023.

ABBOTT DECLARES 399TH CONSECUTIVE QUARTERLY DIVIDEND

On Sept. 21, 2023, the board of directors of Abbott declared the company's quarterly dividend of \$0.51 per share. Abbott's cash dividend is payable Nov. 15, 2023, to shareholders of record at the close of business on Oct. 13, 2023.

Abbott has increased its dividend payout for 51 consecutive years and is a member of the S&P 500 Dividend Aristocrats Index, which tracks companies that have annually increased their dividend for at least 25 consecutive years.

- For the full-year 2022, COVID-19 testing-related sales were \$8.368 billion and total worldwide sales were \$43.653 billion. For the full-year 2023, Abbott projects COVID-19 testing-related sales of approximately \$1.5 billion.
- Abbott has not provided the related GAAP financial measure for organic sales growth, excluding COVID-19 testing-related sales, on a forward-looking basis because the company is unable to predict the impact of foreign exchange due to the unpredictability of future changes in foreign exchange rates, which could significantly impact reported sales growth.
