Item 2.02 Results of Operations and Financial Condition

On July 18, 2018, Abbott Laboratories announced its results of operations for the second quarter 2018.

Furnished as Exhibit 99.1, and incorporated herein by reference, is the news release issued by Abbott announcing those results. In that news release, Abbott uses various non-GAAP financial measures including, among others, net earnings from continuing operations excluding specified items. These non-GAAP financial measures adjust for factors that are unusual or unpredictable, such as expenses primarily associated with acquisitions and restructuring actions, charges related to cost reduction initiatives, and the recognition of a gain associated with the sale of the Medical Optics business. These non-GAAP financial measures also exclude intangible amortization expense to provide greater visibility on the results of operations excluding these costs, similar to how Abbott's management internally assesses performance. Abbott's management believes the presentation of these non-GAAP financial measures provides useful information to investors regarding Abbott's results of operations as these non-GAAP financial measures allow investors to better evaluate ongoing business performance. Abbott's management also uses these non-GAAP financial measures internally to monitor performance of the businesses. Abbott, however, cautions investors to consider these non-GAAP financial measures in addition to, and not as a substitute for, financial measures prepared in accordance with GAAP.

- · Excludes the current and prior year results for Rapid Diagnostics, which reflect results for Alere Inc., which was acquired on Oct. 3, 2017; and
- Excludes the impact of foreign exchange.

Following are sales by business segment and commentary for the second quarter and first half 2018:

Worldwide Medical Devices sales increased 11.3 percent on a reported basis in the second quarter. On an organic basis, sales increased 8.2 percent. Refer to page 18 for a reconciliation of adjusted historical revenue.

Cardiovascular and Neuromodulation sales growth in the quarter was led by double-digit growth in Electrophysiology and Structural Heart.

In Electrophysiology, growth was led by strong performance in cardiac mapping and ablation as well as share gains from the recent U.S. launch of Abbott's Confirm RxTM Insertable Cardiac Monitor (ICM), the world's first and only smartphone-compatible ICM designed to help physicians remotely identify cardiac arrhythmias. In May, Abbott announced U.S. FDA clearance of Advisor HD Grid Mapping Catheter, Sensor Enabled, which creates highly detailed maps of the heart and expands Abbott's leading electrophysiology product portfolio.

In Vascular, during the second quarter, Abbott received approval from the U.S. FDA for XIENCE Sierra, the newest generation of its gold-standard coronary stent system, which offers design and technology advances to provide an easier implant and greater ability to treat complex blockages. During the quarter, XIENCE Sierra also received national reimbursement in Japan to treat people with coronary artery disease.

6

Growth in Structural Heart was driven by several product areas across Abbott's broad portfolio, including AMPLATZERTM PFO Occluder and MitraClip, Abbott's market-leading device for the minimally invasive treatment of mitral regurgitation. In July, Abbott announced U.S. FDA approval for a next-generation version of MitraClip, with an enhanced design that provides even greater precision and accuracy.

In Diabetes Care, where sales increased 39.8 percent on a reported basis and 33.6 percent on an organic basis, growth was led by continued rapid market uptake of FreeStyle® Libre, Abbott's revolutionary sensor-based continuous glucose monitoring (CGM) system, which removes the need for routine fingersticks¹ for people with diabetes.
