Note 1 — Basis of Presentation

The accompanying unaudited, condensed consolidated financial statements have been prepared pursuant to rules and regulations of the Securities and Exchange Commission and, therefore, do not include all information and footnote disclosures normally included in audited financial statements. However, in the opinion of management, all adjustments (which include only normal adjustments) necessary to present fairly the results of operations, financial position and cash flows have been made. It is suggested that these statements be read in conjunction with the financial statements included in Abbott's Annual Report on Form 10-K for the year ended December 31, 2019. The condensed consolidated financial statements include the accounts of the parent company and subsidiaries, after elimination of intercompany transactions.

Note 2 — New Accounting Standards

Recently Adopted Accounting Standards

In June 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2016-13, *Financial Instruments – Credit Losses*, which changes the methodology to be used to measure credit losses for certain financial instruments and financial assets, including trade receivables. The new methodology requires the recognition of an allowance that reflects the current estimate of credit losses expected to be incurred over the life of the financial asset. Abbott adopted the standard on January 1, 2020 and recorded a cumulative adjustment that was not significant to Earnings employed in the business in the Condensed Consolidated Balance Sheet.

Recent Accounting Standards Not Yet Adopted

In December 2019, the FASB issued ASU 2019-12, *Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes*, which among other things, eliminates certain exceptions in the current rules regarding the approach for intraperiod tax allocations and the methodology for calculating income taxes in an interim period, and clarifies the accounting for transactions that result in a step-up in the tax basis of goodwill. The standard becomes effective for Abbott in the first quarter of 2021 and early adoption is permitted. Abbott does not expect adoption of this new standard to have a material impact on its condensed consolidated financial statements.

Note 3 — Revenue

Abbott's revenues are derived primarily from the sale of a broad line of health care products under short-term receivable arrangements. Abbott has four reportable segments: Established Pharmaceutical Products, Diagnostic Products, Nutritional Products, and Medical Devices

The following tables provide detail by sales category:

Remaining Performance Obligations

As of June 30, 2020, the estimated revenue expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) was approximately \$3.5 billion in the Diagnostics segment and approximately \$415 million in the Medical Devices segment. Abbott expects to recognize revenue on approximately 60 percent of these remaining performance obligations over the next 24 months, approximately 17 percent over the subsequent 12 months and the remainder thereafter.

These performance obligations primarily reflect the future sale of reagents/consumables in contracts with minimum purchase obligations, extended warranty or service obligations related to previously sold equipment, and remote monitoring services related to previously implanted devices. Abbott has applied the practical expedient described in Accounting Standards Codification (ASC) 606-10-50-14 and has not included remaining performance obligations related to contracts with original expected durations of one year or less in the amounts above.

Other Contract Assets and Liabilities

Abbott discloses Trade receivables separately in the Condensed Consolidated Balance Sheet at the net amount expected to be collected. Contract assets primarily relate to Abbott's conditional right to consideration for work completed but not billed at the reporting date. Contract assets at the beginning and end of the period, as well as the changes in the balance, were not significant.

Contract liabilities primarily relate to payments received from customers in advance of performance under the contract. Abbott's contract liabilities arise primarily in the Medical Devices reportable segment when payment is received upfront for various multi-period extended service arrangements.

Changes in the contract liabilities during the period are as follows:

(in millions)	
Contract Liabilities	
Balance at December 31, 2019	\$ 294
Unearned revenue from cash received during the period	233
Revenue recognized related to contract liability balance	(192)
Balance at June 30, 2020	\$ 335

Note 4 — Supplemental Financial Information

Shares of unvested restricted stock that contain non-forfeitable rights to dividends are treated as participating securities and are included in the computation of earnings per share under the two-class method. Under the two-class method, net earnings are allocated between common shares and participating securities. Earnings from Continuing Operations allocated to common shares for the three months ended June 30, 2020 and 2019 were \$534 million and \$1.0 billion, respectively, and for the six months ended June 30, 2020 and 2019 were \$534 million and \$1.0 billion, respectively, and for the six months ended June 30, 2020 and 2019 were \$1.095 billion and \$1.668 billion, respectively.

Other, net in Net cash from operating activities in the Condensed Consolidated Statement of Cash Flows for the first six months of 2020 includes \$335 million of pension contributions and the payment of cash taxes of approximately \$285 million. The first six months of 2019 includes \$326 million of pension contributions and the payment of cash taxes of approximately \$615 million.

Earnings from discontinued operations, net of tax, in the first six months of 2020 include the recognition of \$20 million of tax benefits as a result of the resolution of various tax positions related to the previous sale of a business that was reported as a discontinued operation.

The following summarizes the activity for the first six months of 2020 related to the allowance for doubtful accounts as of June 30, 2020:

(in millions)	
Allowance for Doubtful Accounts	
Balance at December 31, 2019	\$ 228
Impact of adopting ASU 2016-13	7
Provisions/charges to income	45
Amounts charged off and other deductions	(14)
Balance at June 30, 2020	\$ 266

The allowance for doubtful accounts reflects the current estimate of credit losses expected to be incurred over the life of the accounts receivables. Abbott considers various factors in establishing, monitoring, and adjusting its allowance for doubtful accounts including the aging of the accounts and aging trends, the historical level of charge-offs, and specific exposures related to particular customers. Abbott also monitors other risk factors and forward-looking information, such as country risk, when determining credit limits for customers and establishing adequate allowances.

The components of long-term investments as of June 30, 2020 and December 31, 2019 are as follows:

(in millions)	ıne 30, 2020	ember 31, 2019
Long-term Investments		
Equity securities	\$ 728	\$ 836
Other	48	47
Total	\$ 776	\$ 883

Abbott's long-term investments as of June 30, 2020, declined versus the balance as of December 31, 2019, due to investment impairments totaling approximately \$110 million, which were recorded in Other (income) expense, net within the Condensed Consolidated Statement of Earnings.

Abbott's equity securities as of June 30, 2020, include approximately \$328 million of investments in mutual funds that are held in a rabbi trust and were acquired as part of the St. Jude Medical, Inc. (St. Jude Medical) business acquisition. These investments, which are specifically designated as available for the purpose of paying benefits under a deferred compensation plan, are not available for general corporate purposes and are subject to creditor claims in the event of insolvency.

Abbott also holds certain investments as of June 30, 2020 with a carrying value of approximately \$283 million that are accounted for under the equity method of accounting and other equity investments with a carrying value of approximately \$102 million that do not have a readily determinable fair value. The \$102 million carrying value is net of an approximately \$60 million impairment of an investment in the second quarter of 2020 for which Abbott had previously recorded an unrealized gain of approximately \$50 million in 2018.

In the first quarter of 2019, in conjunction with the acquisition of Cephea Valve Technologies, Inc., Abbott acquired a research & development (R&D) asset valued at \$102 million, which was immediately expensed. The \$102 million of expense was recorded in the R&D line of Abbott's Condensed Consolidated Statement of Earnings.

Note 5 — Changes in Accumulated Other Comprehensive Income (Loss)

The changes in accumulated other comprehensive income (loss), net of income taxes, are as follows:

Reclassified amounts for foreign currency translation are recorded in the Condensed Consolidated Statement of Earnings as Net foreign exchange (gain) loss; and amounts for cash flow hedges are recorded as Cost of products sold. Net actuarial losses and prior service cost are included as a component of net periodic benefit costs; see Note 12 for additional details.

Note 6 — Goodwill and Intangible Assets

The total amount of goodwill reported was \$23.1 billion at June 30, 2020 and \$23.2 billion at December 31, 2019. Foreign currency translation adjustments decreased goodwill by approximately \$111 million in the first six months of 2020. The amount of goodwill related to reportable segments at June 30, 2020 was \$2.9 billion for the Established Pharmaceutical Products segment, \$286 million for the Nutritional Products segment, \$3.7 billion for the Diagnostic Products segment, and \$16.2 billion for the Medical Devices segment. There was no reduction of goodwill relating to impairments in the first six months of 2020.

The gross amount of amortizable intangible assets, primarily product rights and technology was \$27.5 billion as of June 30, 2020 and \$27.6 billion as of December 31, 2019, and accumulated amortization was \$12.9 billion as of June 30, 2020 and \$11.9 billion as of December 31, 2019. Foreign currency translation adjustments decreased intangible assets by \$150 million for the first six months of 2020. Abbott's estimated annual amortization expense for intangible assets is approximately \$2.1 billion in 2020, \$2.0 billion in 2021, 2022, and 2023 and \$1.9 billion in 2024.

Indefinite-lived intangible assets, which relate to in-process R&D acquired in a business combination, were approximately \$1.2 billion and \$1.3 billion as of June 30, 2020 and December 31, 2019, respectively.

Note 7 — Restructuring Plans

From 2017 to 2020, Abbott management approved restructuring plans as part of the integration of the acquisitions of St. Jude Medical into the Medical Devices segment, and Alere Inc. (Alere) into the Diagnostic Products segment, in order to leverage economies of scale and reduce costs. In the first six months of 2020, charges of \$10 million were recognized, of which \$3 million is recorded in Cost of products sold, \$1 million is recorded in Research and development and \$6 million as Selling, general and administrative expense. The following summarizes the activity for the first six months of 2020 related to these actions and the status of the related accrual as of June 30, 2020:

(in millions)	
Accrued balance at December 31, 2019	\$ 46
Restructuring charges recorded in 2020	10
Payments and other adjustments	(20)
Accrued balance at June 30, 2020	\$ 36

From 2017 to 2020, Abbott management approved plans to streamline operations in order to reduce costs and improve efficiencies in various Abbott businesses including the nutritional, established pharmaceuticals and vascular businesses. In the first six months of 2020, charges of \$23 million were recognized, of which \$1 million is recorded in Cost of products sold, \$1 million is recorded in Research and development and \$21 million as Selling, general and administrative expense. The following summarizes the activity for the first six months of 2020 related to these restructuring actions and the status of the related accrual as of June 30, 2020:

(in millions)	
Accrued balance at December 31, 2019	\$ 79
Restructuring charges recorded in 2020	23
Payments and other adjustments	(18)
Accrued balance at June 30, 2020	\$ 84

Note 8 — Incentive Stock Programs

In the first six months of 2020, Abbott granted 4,006,336 stock options, 568,471 restricted stock awards and 5,143,501 restricted stock units under its current incentive stock program. At June 30, 2020, approximately 113 million shares were reserved for future grants. Information regarding the number of options outstanding and exercisable at June 30, 2020 is as follows:

	Out	standing	E	exercisable
Number of shares	30	,771,662	2	1,898,193
Weighted average remaining life (years)		6.4		5.4
Weighted average exercise price	\$	54.61	\$	45.34
Aggregate intrinsic value (in millions)	\$	1,133	\$	1,009

The total unrecognized share-based compensation cost at June 30, 2020 amounted to approximately \$594 million which is expected to be recognized over the next three years.

Note 9 — Debt and Lines of Credit

On June 24, 2020, Abbott completed the issuance of \$1.3 billion aggregate principal amount of senior notes, consisting of \$650 million of its 1.15% Notes due 2028 and \$650 million of its 1.40% Notes due 2030.

On February 24, 2019, Abbott redeemed the \$500 million outstanding principal amount of its 2.80% Notes due 2020.

Note 10 — Financial Instruments, Derivatives and Fair Value Measures

Certain Abbott foreign subsidiaries enter into foreign currency forward exchange contracts to manage exposures to changes in foreign exchange rates primarily for anticipated intercompany purchases by those subsidiaries whose functional currencies are not the U.S. dollar. These contracts, with gross notional amounts totaling \$7.4 billion at June 30, 2020 and \$6.8 billion at December 31, 2019 are designated as cash flow hedges of the variability of the cash flows due to changes in foreign exchange rates and are recorded at fair value. Accumulated gains and losses as of June 30, 2020 will be included in Cost of products sold at the time the products are sold, generally through the next twelve to eighteen months.

Abbott enters into foreign currency forward exchange contracts to manage currency exposures for foreign currency denominated third-party trade payables and receivables, and for intercompany loans and trade accounts payable where the receivable or payable is denominated in a currency other than the functional currency of the entity. For intercompany loans, the contracts require Abbott to sell or buy foreign currencies, primarily European currencies, in exchange for primarily U.S. dollars and other European currencies. For intercompany and trade payables and receivables, the currency exposures are primarily the U.S. dollar and European currencies. At June 30, 2020 and December 31, 2019, Abbott held the gross notional amount of \$9.2 billion and \$9.1 billion, respectively, of such foreign currency forward exchange contracts.

Abbott has designated a yen-denominated, 5-year term loan of approximately \$556 million and \$546 million as of June 30, 2020 and December 31, 2019, respectively, as a hedge of the net investment in certain foreign subsidiaries. The change in the value of the debt, which is due to changes in foreign exchange rates, is recorded in Accumulated other comprehensive income (loss), net of tax.

Abbott is a party to interest rate hedge contracts totaling approximately \$2.9 billion at June 30, 2020 and December 31, 2019 to manage its exposure to changes in the fair value of fixed-rate debt. These contracts are designated as fair value hedges of the variability of the fair value of fixed-rate debt due to changes in the long-term benchmark interest rates. The effect of the hedge is to change a fixed-rate interest obligation to a variable rate for that portion of the debt. Abbott records the contracts at fair value and adjusts the carrying amount of the fixed-rate debt by an offsetting amount.

The following table summarizes the amounts and location of certain derivative financial instruments as of June 30, 2020 and December 31, 2019:

				Fair	Value - Assets		Fair Value - Liabilities						
(in millions)	June 30, 2020				Balance Sheet Caption	June 30, 2020			ec. 31, 2019	Balance Sheet Caption

-	\$	413	\$	196		\$	661	\$	635				

The following table summarizes the activity for foreign currency forward exchange contracts designated as cash flow hedges and certain other derivative financial instruments, as well as the amounts and location of income (expense) and gain (loss) reclassified into income for the three and six months ended June 30, 2020 and 2019.

	Gain (loss) Recogniz Comprehensive In Three Months Ended June 30						Income (expense) a Reclassified in Three Months Ended June 30						è Iont	hs			
(in millions)		2020	_	2019	202	20_	_2	019	2	2020		2019	2	2020	20	19	Income Statement Caption
Foreign currency forward exchange contracts designated as cash flow hedges	\$	(89)	\$	(2)	\$ 1	38	\$	(21)	\$	31	\$	17	\$	42	\$	32	Cost of products sold
Debt designated as a hedge of net investment in a foreign subsidiary		(2)		_	(10)		-		_		_		-		_	n/a
Interest rate swaps designated as fair value hedges		n/a		n/a	r	ı/a		n/a		27		96		195		139	Interest expense

Gains of \$67 million and \$26 million were recognized in the three months ended June 30, 2020 and 2019, respectively, related to foreign currency forward exchange contracts not designated as a hedge. Losses of \$98 million and gains of \$75 million were recognized in the six months ended June 30, 2020 and 2019, respectively, related to foreign currency forward exchange contracts not designated as a hedge. These amounts are reported in the Condensed Consolidated Statement of Earnings on the Net foreign exchange (gain) loss line.

The carrying values and fair values of certain financial instruments as of June 30, 2020 and December 31, 2019 are shown in the following table. The carrying values of all other financial instruments approximate their estimated fair values. The counterparties to financial instruments consist of select major international financial institutions. Abbott does not expect any losses from non-performance by these counterparties.

		June 3	0, 2		Decembe	r 31, 2019		
(in millions)		arrying Value		Fair Value	_	Carrying Value	Fair Value	
Long-term Investment Securities:								
Equity securities	\$	728	\$	728	\$	836	\$	836
Other		48		48		47		47
Total Long-term Debt	((19,474)		(23,296)		(17,938)		(20,772)
Foreign Currency Forward Exchange Contracts:								
Receivable position		170		170		148		148
(Payable) position		(105)		(105)		(89)		(89)
Interest Rate Hedge Contracts:								
Receivable position		243		243		48		48

The fair value of the debt was determined based on significant other observable inputs, including current interest rates.

The following table summarizes the bases used to measure certain assets and liabilities at fair value on a recurring basis in the balance sheet:

		Basis of Fair Value Measurement									
(in millions)	Outstanding Balances		Quoted Prices in Active Markets		Significant Other Observable Inputs		Significant nobservable Inputs				
June 30, 2020:											
Equity securities	\$ 343	\$	343	\$	_	\$	_				
Interest rate swap derivative financial instruments	243		_		243		_				
Foreign currency forward exchange contracts	170		_		170		_				
Total Assets	\$ 756	\$	343	\$	413	\$	_				
Fair value of hedged long-term debt	\$ 3,082	\$	_	\$	3,082	\$	_				
Foreign currency forward exchange contracts	105		_		105		_				
Contingent consideration related to business combinations	68		_		_		68				
Total Liabilities	\$ 3,255	\$		\$	3,187	\$	68				
December 31, 2019:											
Equity securities	\$ 357	\$	357	\$	_	\$	_				
Interest rate swap derivative financial instruments	48		_		48		_				
Foreign currency forward exchange contracts	148		_		148		_				
Total Assets	\$ 553	\$	357	\$	196	\$					
Fair value of hedged long-term debt	\$ 2,890	\$	_	\$	2,890	\$	_				
Foreign currency forward exchange contracts	89		_		89		_				
Contingent consideration related to business combinations	68		_		_		68				
Total Liabilities	\$ 3,047	\$	_	\$	2,979	\$	68				

The fair value of foreign currency forward exchange contracts is determined using a market approach, which utilizes values for comparable derivative instruments. The fair value of debt was determined based on the face value of the debt adjusted for the fair value of the interest rate swaps, which is based on a discounted cash flow analysis using significant other observable inputs. The fair value of the contingent consideration was determined based on independent appraisals at the time of acquisition, adjusted for the time value of money and other changes in fair value.

Note 11 — Litigation and Environmental Matters

Abbott has been identified as a potentially responsible party for investigation and cleanup costs at a number of locations in the United States and Puerto Rico under federal and state remediation laws and is investigating potential contamination at a number of company-owned locations. Abbott has recorded an estimated cleanup cost for each site for which management believes Abbott has a probable loss exposure. No individual site cleanup exposure is expected to exceed \$4 million, and the aggregate cleanup exposure is not expected to exceed \$10 million.

Abbott is involved in various claims and legal proceedings, and Abbott estimates the range of possible loss for its legal proceedings and environmental exposures to be from approximately \$85 million to \$120 million. The recorded accrual balance at June 30, 2020 for these proceedings and exposures was approximately \$105 million. This accrual represents management's best estimate of probable loss, as defined by FASB ASC No. 450, "Contingencies." Within the next year, legal proceedings may occur that may result in a change in the estimated loss accrued by Abbott. While it is not feasible to predict the outcome of all such proceedings and exposures with certainty, management believes that their ultimate disposition should not have a material adverse effect on Abbott's financial position, cash flows, or results of operations.

Note 12 — Post-Employment Benefits

Retirement plans consist of defined benefit, defined contribution, and medical and dental plans. Net periodic benefit costs, other than service costs, are recognized in the Other (income) expense, net line of the Condensed Consolidated Statement of Earnings. Net cost recognized in continuing operations for the three and six months ended June 30 for Abbott's major defined benefit plans and postemployment medical and dental benefit plans is as follows:

		Defined B	enefit Plans		Medical and Dental Plans				
		Months June 30		Months June 30		Months June 30	Six Months Ended June 30		
(in millions)	2020	2019	2020	2019	2020	2019	2020	2019	
Service cost - benefits earned during the period	\$ 81	\$ 61	\$ 166	\$ 125	\$ 11	\$ 6	\$ 23	\$ 12	
Interest cost on projected benefit obligations	74	85	149	169	9	13	21	26	
Expected return on plan assets	(191)	(178) (383)	(356)	(7)	(7)	(14)	(14)	
Net amortization of:									

Actuarial loss, net	64	33	127	66	2	5	10	11
Prior service cost (credit)	1	1	1	1	(7)	(8)	(14)	(16)
Net cost - continuing operations	\$ 29	\$ 2	\$ 60	\$ 5	\$ 8	\$ 9	\$ 26	\$ 19

Abbott funds its domestic defined benefit plans according to IRS funding limitations. International pension plans are funded according to similar regulations. In the first six months of 2020 and 2019, \$335 million and \$326 million, respectively, were contributed to defined benefit plans and \$11 million was contributed to the post-employment medical and dental plans in each year.

Note 13 — Taxes on Earnings

Taxes on earnings from continuing operations reflect the estimated annual effective rates and include charges for interest and penalties. In the first six months of 2020, taxes on earnings from continuing operations include approximately \$81 million in tax benefits related to the settlement of the former St. Jude Medical consolidated group's 2014 through 2016 federal income tax returns in the U.S. and \$67 million in excess tax benefits associated with share-based compensation. Earnings from discontinued operations, net of tax, in the first six months of 2020 reflect the recognition of \$20 million of net tax benefits primarily as a result of the resolution of various tax positions related to prior years. In the first six months of 2019, taxes on earnings from continuing operations include a \$78 million reduction to the transition tax related to the Tax Cut and Jobs Act (TCJA) and approximately \$90 million in excess tax benefits associated with share-based compensation. The \$78 million reduction to the transition tax liability was the result of the issuance of final transition tax regulations by the U.S. Department of Treasury in the first quarter of 2019.

Tax authorities in various jurisdictions regularly review Abbott's income tax filings. Abbott believes that it is reasonably possible that the recorded amount of gross unrecognized tax benefits may decrease between \$70 million and \$410 million, including cash adjustments, within the next twelve months as a result of concluding various domestic and international tax matters. In the U.S., Abbott's federal income tax returns through 2016 are settled except for the federal income tax returns of the former Alere consolidated group which are settled through 2015.

Note 14 — Segment Information

Abbott's principal business is the discovery, development, manufacture and sale of a broad line of health care products. Abbott's products are generally sold directly to retailers, wholesalers, hospitals, health care facilities, laboratories, physicians' offices and government agencies throughout the world.

Abbott's reportable segments are as follows:

Established Pharmaceutical Products — International sales of a broad line of branded generic pharmaceutical products.

Nutritional Products — Worldwide sales of a broad line of adult and pediatric nutritional products.

Diagnostic Products — Worldwide sales of diagnostic systems and tests for blood banks, hospitals, commercial laboratories, physician offices and alternate-care testing sites. For segment reporting purposes, the Core Laboratory Diagnostics, Rapid Diagnostics, Molecular Diagnostics and Point of Care Diagnostics divisions are aggregated and reported as the Diagnostic Products segment.

Medical Devices — Worldwide sales of rhythm management, electrophysiology, heart failure, vascular, structural heart, neuromodulation and diabetes care products. For segment reporting purposes, the Cardiac Rhythm Management, Electrophysiology and Heart Failure, Vascular, Neuromodulation, Structural Heart and Diabetes Care divisions are aggregated and reported as the Medical Devices segment.

Abbott's underlying accounting records are maintained on a legal entity basis for government and public reporting requirements. Segment disclosures are on a performance basis consistent with internal management reporting. Intersegment transfers of inventory are recorded at standard cost and are not a measure of segment operating earnings. The cost of some corporate functions and the cost of certain employee benefits are charged to segments at predetermined rates that approximate cost. Remaining costs, if any, are not allocated to segments. In addition, intangible asset amortization is not allocated to operating segments, and intangible assets and goodwill are not included in the measure of each segment's assets.

The following segment information has been prepared in accordance with the internal accounting policies of Abbott, as described above, and is not presented in accordance with generally accepted accounting principles applied to the consolidated financial statements.

⁽a) Approximately 50 percent of the annual net cost of share-based awards will typically be recognized in the first quarter due to the timing of the granting of share-based awards.

⁽b) Other, net for the three and six months ended June 30, 2020 and 2019 includes integration costs associated with the acquisition of St. Jude Medical and Alere, and restructuring charges. Other, net for the three and six months ended June 30, 2020 also includes impairments of equity investments. Other, net for the six months ended June 30, 2019 also includes a charge associated with an R&D asset acquired and immediately expensed.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Financial Review - Results of Operations

Abbott's revenues are derived primarily from the sale of a broad line of health care products under short-term receivable arrangements. Patent protection and licenses, technological and performance features, and inclusion of Abbott's products under a contract impact which products are sold; price controls, competition and rebates impact the net selling prices of products; and foreign currency translation impacts the measurement of net sales and costs. Abbott's primary products are medical devices, diagnostic testing products, nutritional products and branded generic pharmaceuticals.

During the first six months of 2020, the coronavirus (COVID-19) pandemic affected Abbott's diversified health care businesses in various ways. As is further described below, some businesses faced challenges, others have been relatively stable, and still others are performing at the levels required to successfully meet new demands. Beginning in February, cardiovascular and neuromodulation procedures and routine core laboratory diagnostic testing volumes declined in China as that country implemented quarantine restrictions and postponed non-emergency health care activities. As March progressed, procedures and routine testing volumes in China steadily improved from the low levels seen in February.

As COVID-19 spread geographically, the impact initially expanded to certain countries in Asia and Europe beginning in late February, and more broadly across Europe and the U.S. during March and April. As the health care systems in these countries shifted their focus to fighting COVID-19, the impact on cardiovascular and neuromodulation device procedures and routine diagnostic testing volumes was similar to what was experienced in China in February. As a result, as is further described below, sales of cardiovascular and neuromodulation devices and routine diagnostic tests declined during the first six months of 2020 from the prior year. Encouragingly, routine testing and procedure volume improved across Abbott's hospital-based businesses as the second quarter progressed as both demand for procedures and availability of health care resources began to return to more normal levels.

Abbott mobilized its teams across multiple fronts to develop and launch six new diagnostic tests for COVID-19:

- In March, Abbott launched a molecular test on its *m*2000™ RealTime lab-based platform to detect COVID-19 pursuant to an Emergency Use Authorization (EUA) in the U.S. and CE Mark.
- In March, Abbott also launched a molecular test to detect COVID-19 on its ID NOWTM rapid point-of-care platform in the U.S. pursuant to an EUA.
- In April, Abbott launched a lab-based serology blood test on its ARCHITECT® i1000SR and i2000SR® laboratory instruments for the detection of an antibody to determine if someone was previously infected with the virus. The serology test was granted an EUA in the U.S. on April 26, 2020 and CE Mark on April 24, 2020.
- In May, Abbott launched a lab-based serology blood test on its Alinity® i system pursuant to an EUA in the U.S. and CE Mark.
- In May, Abbott also launched a molecular test on its Alinity m system to detect COVID-19 pursuant to an EUA in the U.S. Abbott received CE Mark for this test in June 2020.
- In June, Abbott launched a lateral flow COVID-19 rapid antibody test on its Panbio™ system in select countries. This serology test detects an antibody to determine if someone was previously infected with the virus.

During the first six months of 2020, Abbott's COVID-19 testing related sales totaled \$652 million, of which the vast majority were generated in the second quarter of 2020.

Abbott is continually implementing business continuity plans in the face of the pandemic. Due to the critical nature of its products and services, Abbott was generally exempt from governmental orders issued during the first quarter of 2020 in the U.S. and other countries requiring businesses to cease operations. The majority of its office-based work was conducted remotely during the period of such governmental orders and the company implemented strict travel restrictions. As governmental orders were lifted in May and June 2020, Abbott entered a new phase in its operations whereby some office-based employees started working at Abbott's offices on a rotational basis. Abbott has taken aggressive steps to limit exposure and enhance the safety of its facilities for employees working to continue to supply healthcare products to hospital and other customers.

With respect to Abbott's financial position, at June 30, 2020, Abbott's cash and cash equivalents and short-term investments totaled approximately \$5.0 billion compared to \$4.1 billion at December 31, 2019. The increase includes the impact of a \$1.3 billion bond offering that was completed in June 2020. Existing credit agreements are in place that would provide additional access to \$5 billion, if needed.

Due to the unpredictability of the duration and impact of the current COVID-19 pandemic, the extent to which the COVID-19 pandemic may have a material effect on its business, financial condition or results of operations is uncertain.

The following table details sales by reportable segment for the three and six months ended June 30. Percent changes are versus the prior year and are based on unrounded numbers.

	Net Sales to External Customers										
(in millions)		ree Months Ended June 30, 2020		ree Months Ended June 30, 2019	Total Change	Impact of Foreign Exchange	Total Change Excl. Foreign Exchange

Note: In order to compute results excluding the impact of exchange rates, current year U.S. dollar sales are multiplied or divided, as appropriate, by the current year average foreign exchange rates and then those amounts are multiplied or divided, as appropriate, by the prior year average foreign exchange rates.

The 5.4 percent decrease in total net sales in the second quarter of 2020, excluding the impact of foreign exchange, was primarily driven by a decrease in the Medical Devices segment as a result of the COVID-19 pandemic. Abbott's net sales were unfavorably impacted by changes in foreign exchange rates during the period compared to the second quarter of 2019. The relatively stronger U.S. dollar decreased total international sales by 4.4 percent and total sales by 2.8 percent in the second quarter of 2020.

The 0.7 percent decrease in total net sales during the first six months of 2020, excluding the impact of foreign exchange, was driven by a decrease in the Medical Devices segment due to reduced procedure volumes as a result of the pandemic. The decrease in the Medical Devices segment was mostly offset by growth in the Nutritional Products, Diagnostics and Established Pharmaceuticals segments. Abbott's net sales were unfavorably impacted by changes in foreign exchange rates in the first six months of 2020 as the relatively stronger U.S. dollar decreased total international sales by 3.5 percent and total sales by 2.3 percent.

The table below provides detail by sales category for the six months ended June 30. Percent changes are versus the prior year and are based on unrounded numbers.

(in millions)	Jı	ıne 30, 2020	June 30, 2019	Total Change	Impact of Foreign Exchange	Total Change Excl. Foreign Exchange

Key Emerging Markets for the Established Pharmaceutical Products business include India, Russia, Brazil and China, along with several other markets that represent the most attractive long-term growth opportunities for Abbott's branded generics product portfolio. Excluding the unfavorable effect of foreign exchange, sales in the Key Emerging Markets increased 5.9 percent compared to the first six months of 2019 led primarily by growth in China, Russia, India and various countries in Latin America. The six-month growth rate was negatively impacted by lower demand in the second quarter of 2020 due to the increased spread of COVID-19 across several emerging market countries. Other Emerging Markets, excluding the effect of foreign exchange, decreased by 2.1 percent in the first six months of 2020.

International Pediatric Nutritional sales, excluding the effect of foreign exchange, decreased 1.0 percent in the first six months of 2020 versus the comparable 2019 period. Growth across Abbott's pediatric products in various countries in Southeast Asia and Latin America was more than offset by challenging market dynamics in the Greater China infant category. U.S. Pediatric Nutritional sales increased 8.0 percent primarily due to increased demand for Pedialyte[®], Abbott's oral rehydration brand. The 11.5 percent increase in International Adult Nutritional sales, excluding the effect of foreign exchange, reflects continued growth of the Glucerna[®] and Ensure[®] brands in several countries. U.S. Adult Nutritional sales increased 2.2 percent primarily due to growth in Ensure.

In the Diagnostics segment, Core Laboratory sales decreased 9.2 percent, excluding the effect of foreign exchange, as the lower volume of routine testing performed in hospital and other laboratories due to COVID-19 was partially offset by sales of Abbott's COVID-19 laboratory-based tests for the detection of the IgG antibody, which determines if someone was previously infected with the virus. Core Laboratory IgG antibody testing-related sales on Abbott's ARCHITECT and Alinity i platforms were \$152 million in the first six months of 2020. The 135.7 percent increase in Molecular Diagnostics sales, excluding the effect of foreign exchange, reflects higher volumes due to demand for Abbott's laboratory-based molecular tests for COVID-19 on its m2000 and Alinity m platforms. Molecular Diagnostics COVID-19 testing-related sales were \$318 million in the first six months of 2020.

In Rapid Diagnostics, sales increased 8.1 percent, excluding the effect of foreign exchange, as strong demand for Abbott's point-of-care COVID-19 molecular test on its ID NOW platform in the U.S. and increased testing in the first quarter for the flu in the U.S. was partially offset by the unfavorable impact of COVID-19 on routine diagnostic testing. Rapid Diagnostics COVID-19 testing-related sales were \$182 million in the first six months of 2020.

Excluding the effect of foreign exchange, total Medical Devices sales decreased 8.8 percent; the decrease was driven by the impact of COVID-19 on Abbott's cardiovascular and neuromodulation businesses, partially offset by double-digit growth in Diabetes Care. Growth in Diabetes Care sales was driven by continued growth of FreeStyle Libre[®], Abbott's continuous glucose monitoring system, internationally and in the U.S. FreeStyle Libre sales totaled \$1.197 billion in the first six months of 2020, which reflected a 50.4 percent increase, excluding the effect of foreign exchange, over the first six months of 2019 when FreeStyle Libre sales totaled \$812 million. In June, Abbott announced U.S. Food and Drug Administration (FDA) clearance of FreeStyle Libre 2 as an integrated continuous glucose monitoring (iCGM) system for adults and children ages 4 and older with diabetes.

In Abbott's cardiovascular and neuromodulation businesses, revenues during the first six months of 2020 were negatively impacted by reduced procedure volumes due to COVID-19. Procedure volume trends improved over the course of the second quarter as both demand for procedures and availability of healthcare resources began to return to more normal levels. In April, Abbott announced CE Mark approval for its TriClip[®] heart valve repair system, the world's first minimally invasive, clip-based tricuspid heart valve repair device. In July, Abbott announced U.S. FDA approval of its next-generation Gallant™ implantable cardioverter defibrillator and cardiac resynchronization therapy defibrillator devices to help manage heart rhythm disorders. These devices offer Bluetooth technology and a new patient smartphone app for improved remote monitoring and enhanced patient-physician engagement.

In April 2017, Abbott received a warning letter from the U.S. FDA related to its manufacturing facility in Sylmar, CA which was acquired by Abbott on January 4, 2017 as part of the acquisition of St. Jude Medical. This facility manufactures implantable cardioverter defibrillators, cardiac resynchronization therapy defibrillators, and monitors. Abbott prepared and executed a comprehensive plan of corrective actions. On April 28, 2020, Abbott received a letter from the FDA indicating that, based on the FDA's evaluation, it appeared that Abbott had addressed the items in the warning letter. As a result, the warning letter is considered closed.

The gross profit margin percentage was 47.9 percent for the second quarter of 2020 compared to 52.8 percent for the second quarter of 2019. The gross profit margin percentage was 49.1 percent for the first six months of 2020 compared to 52.3 percent for the first six months of 2019. The decreases in the gross profit margin percentage primarily reflect the unfavorable impact of COVID-19 and the mix of geographical sales on the cardiovascular, neuromodulation and core diagnostic businesses, as well as the increase in intangible asset amortization and the unfavorable effect of foreign exchange on gross margin in 2020.

Research and development expenses decreased by \$13 million, or 2.1 percent, in the second quarter of 2020 and decreased by \$107 million, or 8.6 percent, in the first six months of 2020 compared to the prior year. The decrease in the second quarter of 2020 reflects lower R&D spending in various businesses and the favorable effect of foreign exchange. The decrease in R&D spending in the first six months of 2020 primarily reflects the immediate expensing in the first quarter of 2019 of an R&D asset valued at \$102 million, in conjunction with the acquisition of Cephea Valve Technologies, Inc. The decrease in R&D expense during the first six months of 2020 was also driven by the favorable effect of foreign exchange. For the six months ended June 30, 2020, research and development expenditures totaled \$608 million for the Medical Devices segment, \$270 million for the Diagnostic Products segment, \$90 million for the Nutritional Products segment and \$85 million for the Established Pharmaceutical Products segment.

Selling, general and administrative (SG&A) expenses decreased 6.5 percent in the second quarter and decreased 1.8 percent in the first six months of 2020. The decrease in the quarter is primarily due to the favorable effect of foreign exchange, lower travel expenses due to COVID-19 mobility restrictions, and various cost saving initiatives to mitigate the unfavorable impact of COVID-19 on sales in 2020. The decrease in the first six months of 2020 is due primarily to the favorable effect of foreign exchange.

Restructuring Plans

The results for the first six months of 2020 reflect charges under approved restructuring plans as part of the integration of the acquisitions of St. Jude Medical and Alere or as a part of various cost reduction programs. Abbott recorded employee related severance and other charges of \$33 million in the first six months of 2020 related to these initiatives, of which \$4 million is recognized in Cost of products sold, \$2 million is recognized in Research and development and \$27 million is recognized in SG&A. See Note 7 to the financial statements, "Restructuring Plans," for additional information regarding these charges.

Other (Income) Expense, net

Other (income) expense, net totaled \$22 million of expense in the second quarter of 2020 compared to \$38 million of income in 2019 and \$21 million of expense in the first six months of 2020 compared to \$85 million of income in 2019. The changes in Other (income) expense, net primarily reflect equity investment impairments that totaled approximately \$60 million in the second quarter of 2020 and \$110 million in the first six months of 2020.

Interest Expense, net

Interest expense, net decreased \$21 million in the second quarter of 2020 and \$48 million in the first six months of 2020 due to a reduction in interest expense resulting from the favorable impact of the euro debt financing in November of 2019, the repayment of debt in 2019 and a lower interest rate environment in 2020.

Taxes on Earnings from Continuing Operations

Taxes on earnings from continuing operations reflect the estimated annual effective rates and include charges for interest and penalties. In the first six months of 2020, taxes on earnings from continuing operations include approximately \$81 million in tax benefits related to the settlement of the former St. Jude Medical consolidated group's 2014 through 2016 federal income tax returns in the U.S. and \$67 million in excess tax benefits associated with share-based compensation. Earnings from discontinued operations, net of tax, in the first six months of 2020 reflect the recognition of \$20 million of net tax benefits primarily as a result of the resolution of various tax positions related to prior years. In the first six months of 2019, taxes on earnings from continuing operations include a \$78 million reduction to the transition tax related to the Tax Cut and Jobs Act (TCJA) and approximately \$90 million in excess tax benefits associated with share-based compensation. The \$78 million reduction to the transition tax liability was the result of the issuance of final transition tax regulations by the U.S. Department of Treasury in the first quarter of 2019.

Tax authorities in various jurisdictions regularly review Abbott's income tax filings. Abbott believes that it is reasonably possible that the recorded amount of gross unrecognized tax benefits may decrease between \$70 million and \$410 million, including cash adjustments, within the next twelve months as a result of concluding various domestic and international tax matters. In the U.S., Abbott's federal income tax returns through 2016 are settled except for the federal income tax returns of the former Alere consolidated group which are settled through 2015.

Liquidity and Capital Resources June 30, 2020 Compared with December 31, 2019

On June 24, 2020, Abbott completed the issuance of \$1.3 billion aggregate principal amount of senior notes, consisting of \$650 million of its 1.15% Notes due 2028 and \$650 million of its 1.40% Notes due 2030. Abbott intends to use the net proceeds from the notes offering to repay the approximately \$1.3 billion of 0.00% Notes due September 2020.

The \$903 million increase in cash and cash equivalents from \$3.9 billion at December 31, 2019 to \$4.8 billion at June 30, 2020 primarily reflects the proceeds from the issuance of \$1.3 billion of debt and the favorable impact of cash generated by operating activities, partially offset by the payment of dividends and capital expenditures. Working capital was \$6.3 billion at June 30, 2020 and \$4.8 billion at December 31, 2019. The \$1.5 billion increase was due in large part to the higher level of cash and cash equivalents noted above as well as an increase in inventory related to shifting demand dynamics.

In the Condensed Consolidated Statement of Cash Flows, Net cash from operating activities for the first six months of 2020 totaled \$2.0 billion, an increase of \$265 million over the prior year due primarily to a decrease in cash taxes paid, payment timing for various accrued expenses and lower interest payments, partially offset by lower earnings from operations. Other, net in Net cash from operating activities for the first six months of 2020 was a use of \$205 million and includes the impact of the payment of cash taxes of approximately \$285 million and \$335 million of pension contributions, partially offset by payment timing for various accrued expenses and the impact of non-cash charges related to equity investment impairments. Other, net in Net cash from operating activities for the first six months of 2019 was a use of \$875 million and includes \$326 million of pension contributions and the payment of cash taxes of approximately \$615 million. Abbott expects to fund cash dividends, capital expenditures and its other investments in its businesses with cash flow from operating activities, cash on hand, short-term investments and borrowings.

In September 2019, the board of directors authorized the early redemption of up to \$5 billion of outstanding long-term notes. This bond redemption authorization superseded the board's previous authorization under which \$700 million had not yet been redeemed. In December 2019, Abbott redeemed \$2.850 billion of debt. After this redemption, \$2.15 billion of the \$5 billion debt redemption authorization remains available.

At June 30, 2020, Abbott's long-term debt rating was A- by Standard & Poor's Corporation and A3 by Moody's Investors Service. Abbott expects to maintain an investment grade rating. Abbott has readily available financial resources, including lines of credit of \$5.0 billion which expire in 2023.

In October 2019, the board of directors authorized the repurchase of up to \$3 billion of Abbott's common shares from time to time. This authorization is in addition to the \$270 million unused portion of the share repurchase program authorized in 2014.

On April 27, 2016, the board of directors authorized the issuance and sale for general corporate purposes of up to 75 million common shares that would result in proceeds of up to \$3 billion. No shares have been issued under this authorization.

In each of the first two quarters of 2020, Abbott declared a quarterly dividend of \$0.36 per share on its common shares, which represents an increase of approximately 12.5 percent over the \$0.32 per share quarterly dividend declared in each of the first two quarters of 2019.

Recently Adopted Accounting Standards

In June 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2016-13, *Financial Instruments – Credit Losses*, which changes the methodology to be used to measure credit losses for certain financial instruments and financial assets, including trade receivables. The new methodology requires the recognition of an allowance that reflects the current estimate of credit losses expected to be incurred over the life of the financial asset. Abbott adopted the standard on January 1, 2020 and recorded a cumulative adjustment that was not significant to Earnings employed in the business in the Condensed Consolidated Balance Sheet.

Recently Issued Accounting Standards Not Yet Adopted

In December 2019, the FASB issued ASU 2019-12, *Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes*, which among other things, eliminates certain exceptions in the current rules regarding the approach for intraperiod tax allocations and the methodology for calculating income taxes in an interim period, and clarifies the accounting for transactions that result in a step-up in the tax basis of goodwill. The standard becomes effective for Abbott in the first quarter of 2021 and early adoption is permitted. Abbott does not expect adoption of this new standard to have a material impact on its condensed consolidated financial statements.

Legislative Issues

Abbott's primary markets are highly competitive and subject to substantial government regulations throughout the world. Abbott expects debate to continue over the availability, method of delivery, and payment for health care products and services. It is not possible to predict the extent to which Abbott or the health care industry in general might be adversely affected by these factors in the future. A more complete discussion of these factors is contained in Item 1, Business, and Item 1A, Risk Factors, in the 2019 Annual Report on Form 10-K.

Private Securities Litigation Reform Act of 1995 — A Caution Concerning Forward-Looking Statements

Under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, Abbott cautions that any forward-looking statements made by Abbott are subject to risks and uncertainties, including the impact of the COVID-19 pandemic on Abbott's operations and financial results, that may cause actual results to differ materially from those indicated in the forward-looking statements. Economic, competitive, governmental, technological and other factors that may affect Abbott's operations are discussed in Item 1A, "Risk Factors", in the 2019 Annual Report on Form 10-K and in Item 1A, "Risk Factors", in the Quarterly Report on Form 10-Q for the quarter ended March 31, 2020. Abbott undertakes no obligation to release publicly any revisions to forward-looking statements as a result of subsequent events or developments, except as required by law.

PART I. FINANCIAL INFORMATION

Item 4. Controls and Procedures

- (a) Evaluation of disclosure controls and procedures. The President and Chief Executive Officer, Robert B. Ford, and Chief Financial Officer, Robert E. Funck, Jr., evaluated the effectiveness of Abbott Laboratories' disclosure controls and procedures as of the end of the period covered by this report, and concluded that Abbott Laboratories' disclosure controls and procedures were effective to ensure that information Abbott is required to disclose in the reports that it files or submits with the Securities and Exchange Commission (the "Commission") under the Securities Exchange Act of 1934 (the "Exchange Act") is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms, and to ensure that information required to be disclosed by Abbott in the reports that it files or submits under the Exchange Act is accumulated and communicated to Abbott's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.
- (b) Changes in internal control over financial reporting. During the quarter ended June 30, 2020, there were no changes in Abbott's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that have materially affected, or are reasonably likely to materially affect, Abbott's internal control over financial reporting.

PART II. OTHER INFORMATION

<u>Item 1. Legal Proceedings</u>

Abbott is involved in various claims, legal proceedings and investigations, including those described in our Annual Report on Form 10-K for the year ended December 31, 2019.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Issuer Purchases of Equity Securities

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
April 1, 2020 - April 30, 2020	76,831 ⁽¹	98.00	0	\$ 3,270,234,923 (2)
May 1, 2020 - May 31, 2020	9,188 ⁽¹	92.10	0	3,270,234,923 (2)
June 1, 2020 - June 30, 2020	791 ⁽¹	90.90	0	3,270,234,923 (2)
Total	86,810 (1	97.31	0	\$ 3,270,234,923 (2)

^{1.} These shares include the shares deemed surrendered to Abbott to pay the exercise price in connection with the exercise of employee stock options – 76,831 in April, 9,188 in May, and 791 in June.

These shares do not include the shares surrendered to Abbott to satisfy tax withholding obligations in connection with the vesting of restricted stock or restricted stock units.

^{2.} On September 11, 2014, the board of directors authorized the repurchase of up to \$3 billion of Abbott common shares, from time to time (the "2014 Plan"). On October 11, 2019, the board of directors authorized the repurchase of up to \$3 billion of Abbott common shares, from time to time (the "2019 Plan"). The 2019 Plan is in addition to the unused portion of the 2014 Plan.

Item 6. Exhibits

Exhibit No.	Exhibit
4.1	Officers' Certificate Pursuant to Sections 3.1 and 3.3 of the Indenture with respect to 1.150% Notes due 2028 and 1.400% Notes due 2030, filed as Exhibit 4.2 to the Abbott Laboratories Current Report on Form 8-K filed on June 24, 2020.
4.2	Form of 1.150% Notes due 2028, filed as Exhibit 4.3 to the Abbott Laboratories Current Report on Form 8-K filed on June 24, 2020 (included in Exhibit 4.2 of such Current Report on Form 8-K).
4.3	Form of 1.400% Notes due 2030, filed as Exhibit 4.4 to the Abbott Laboratories Current Report on Form 8-K filed on June 24, 2020 (included in Exhibit 4.2 of such Current Report on Form 8-K).
31.1	Certification of Chief Executive Officer Required by Rule 13a-14(a) (17 CFR 240.13a-14(a)).
31.2	Certification of Chief Financial Officer Required by Rule 13a-14(a) (17 CFR 240.13a-14(a)).
Exhibits 32.1	and 32.2 are furnished herewith and should not be deemed to be "filed" under the Securities Exchange Act of 1934.
32.1	Certification of Chief Executive Officer Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification of Chief Financial Officer Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
101	The following financial statements and notes from the Abbott Laboratories Quarterly Report on Form 10-Q for the quarter and six months ended June 30, 2020, formatted in Inline XBRL: (i) Condensed Consolidated Statement of Earnings; (ii) Condensed Consolidated Statement of Comprehensive Income; (iii) Condensed Consolidated Balance Sheet; (iv) Condensed Consolidated Statement of Shareholders' Investment; (v) Condensed Consolidated Statement of Cash Flows; and (vi) Notes to the Condensed Consolidated Financial Statements.
104	Cover Page Interactive Data File (the cover page XBRL tags are embedded in the Inline XBRL document and included in Exhibit 101).

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

ABBOTT LABORATORIES

By: /s/ Robert E. Funck, Jr.

Robert E. Funck, Jr. Executive Vice President, Finance and Chief Financial Officer

Date: July 29, 2020

Certification of Chief Executive Officer Required by Rule 13a-14(a) (17 CFR 240.13a-14(a))

I, Robert B. Ford, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Abbott Laboratories;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of Abbott as of, and for, the periods presented in this report;
- 4. Abbott's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for Abbott and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to Abbott, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - Evaluated the effectiveness of Abbott's disclosure controls and procedures and presented in this report our conclusions
 about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on
 such evaluation; and
 - d) Disclosed in this report any change in Abbott's internal control over financial reporting that occurred during Abbott's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, Abbott's internal control over financial reporting; and
- 5. Abbott's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to Abbott's auditors and the audit committee of Abbott's board of directors:
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect Abbott's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in Abbott's internal control over financial reporting.
